Flanges

# PL2DI

with a highly resistant  
thermoplastic coating  
PPA571 AQUA

- Flanges available with operating pressure bar PN16 from d200 up to d630mm
- Developed for use in mining, seawater and water applications
- Coating PPA571 Aqua highly resistant against corrosion, chemicals, blistering, flaking and cracking
- Coating thickness 400 - 600 microns onto ductile iron
- PPA 571 is bisphenol Free
- PPA571 has water approvals WRAS, AS/NZS 4020, KTW, NSF, DVGW, ACS
- Gives flanges excellent chemical resistance at pH's between 2 and 13: suitable for contact with waste Water EN 598
